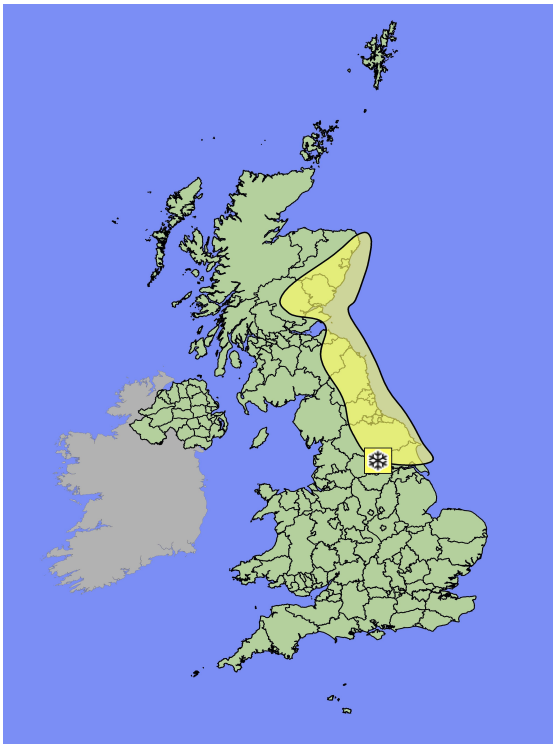
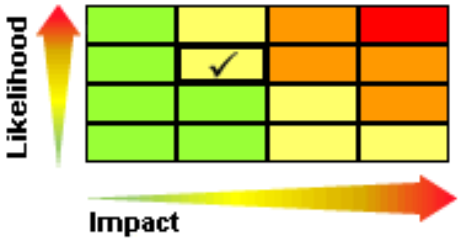
National Severe Weather Warning Service





Chief Forecasters Assessment
Easterly winds are expected to bring cold air across the North Sea from Scandinavia this weekend. This will lead to an increasing risk of snow showers feeding onto eastern counties of England and Scotland, increasingly to low levels by Saturday evening.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **09:00 on Sat, 12th Jan 2013** until **23:55 on Sat, 12th Jan 2013**

Showers will turn increasingly to snow and become more frequent across eastern Scotland during Saturday morning and over northeastern parts of England by evening. Amounts of snow are likely to be highly variable with some places seeing very little, particularly at low levels during the day. However, 5-10 cm could accumulate locally, particularly above 200 metres, with icy surfaces an additional hazard.

The public should be aware of the potential for localised disruption to travel.
